

NASAL APPLICATOR

U.S. PATENT NO. 8,231,588 / 8,905,980

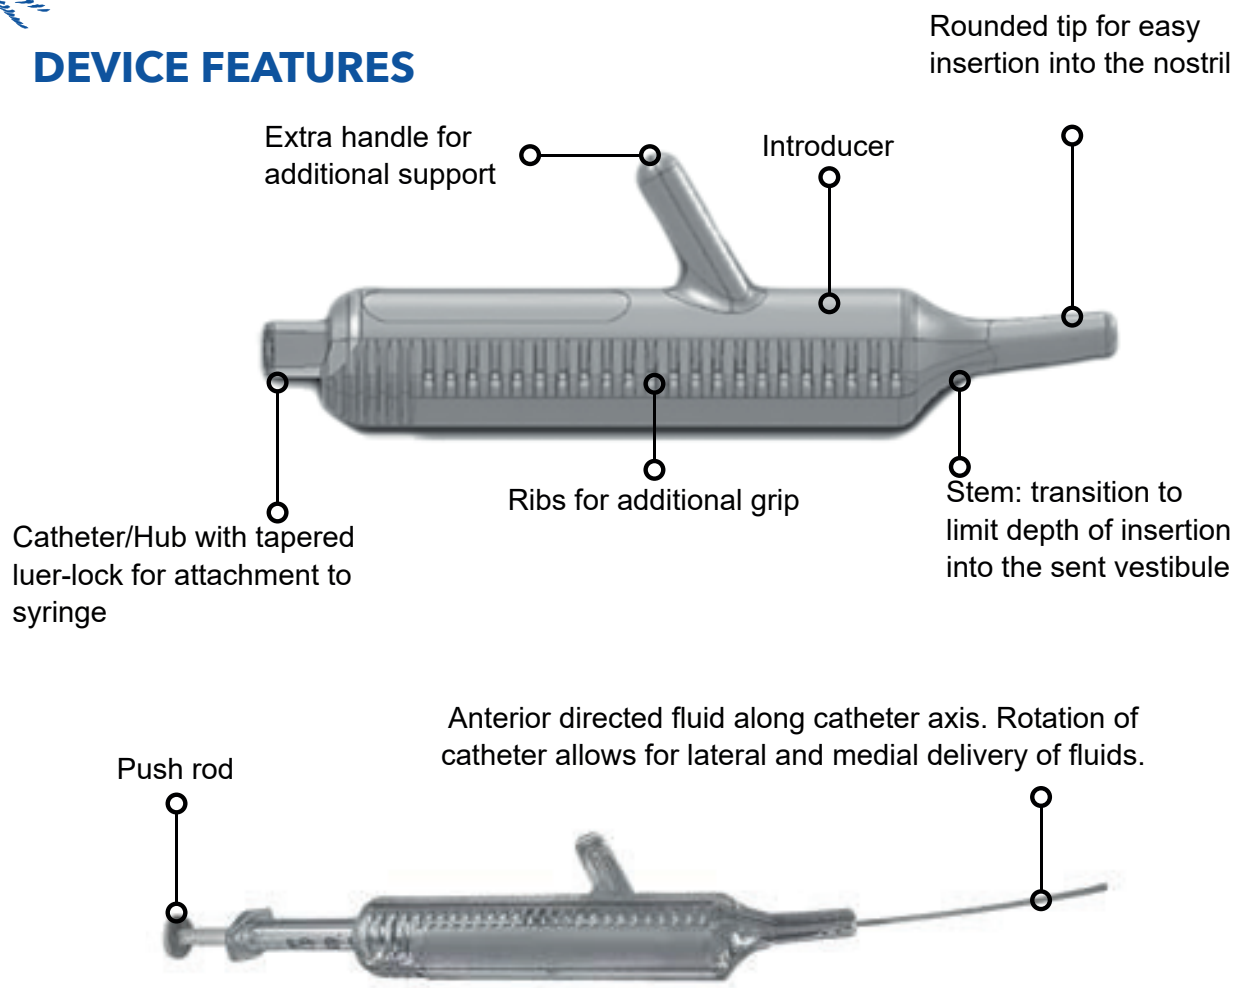

The Tx360® Nasal Applicator is FDA cleared for use in adults with intact nasal mucosa. The sterile, latex free device is designed to attach to a luer-lock syringe to deliver small amounts of fluid ($\leq 1\text{cc}$) to the nasal pathway, including the area of the inferior turbinate, superior turbinate, and sphenopalatine foramen.
